

2-142 Osgoode St.
Ottawa. K1N 6S4

Mr. Mauril Belanger, M.P.,
House of Commons,
Ottawa

15 July 1996

Attention Frederic Huard

Dear Mr. Belanger,

Please accept my heartfelt thanks for convening the meeting this morning. I especially appreciated your supportive introduction.

I hope that Mr. Genest will appreciate that there are issues other than science, that the scientific and clinical cups are not completely empty, that there now exist several measures with which we can identify many persons who have sensitivities, and that we can and should do what we can to implement these existing means to protect this group of Canadians, perhaps ten to twenty per cent of the population, from being hurt - simply because existing knowledge is not being shared, for whatever reason.

I hope Mr. Dingwall can restore the direction, confidence and courage inspired by previous health ministers from time to time.

Again, many thanks!

Chris Brown
